

Light Bulb Recycling Services

We take our environmental responsibility seriously, so you can recycle your spent light bulbs, fluorescent tubes and more with confidence. At **Batteries Plus Bulbs**, our halogen bulbs and LEDs do not contain mercury. Compact fluorescent light bulbs (CFLs) contain a small amount of mercury. While switching to energy-efficient CFLs helps save energy, they must be recycled properly to prevent mercury exposure. We will make sure your bulbs go through the proper recycling process from start to finish.

We recycle the following bulb and lighting products:

Fees may apply.

- Compact Fluorescent Light Bulbs
- Fluorescent Tubes
- Circular Fluorescent
- U Bend Fluorescent
- Plastic Coated and Shatter Shield
- Spot/Flood Lamps
- UV and Germicidal Lamps
- Incandescent
- Halogen
- Cold Cathode
- Metal Halide
- High Pressure Sodium
- Mercury Vapor
- Ballasts

Visit your nearest store for complete details.
