

Weekly Progress Report

Main St., STH 20/83, Village of Waterford

WisDOT Project ID: 2250-12-70

August 9, 2019

Contractor's Work Activities

Current week:

- Grading and excavation, primarily at First Street and Buena Park Road
- Storm sewer installation
- Retaining wall construction
- Electrical conduit installation
- Concrete curb and gutter installation
- Concrete pavement installation
- Misc. erosion control

Week of August 12:

- Storm sewer installation
- Grading, primarily at Buena Park Road
- Retaining wall construction
- Concrete curb and gutter installation
- Concrete pavement installation

Summary

Concrete curb & gutter and concrete pavement installation continue to be the primary work activity on the project. The focal points for this work will be through the downtown area, and at the west end of the project, including the intersection of Buena Park Road. Grading and storm sewer work are ongoing, with these activities primarily focused on Buena Park Road. At the bridge, the first stage of work is nearly complete. Retaining wall construction is under way on R-51-74 (near the bridge) and R-51-72 (near Jefferson & Main). Work on these walls will last for several more weeks. The project will switch into stage 2 throughout the downtown area on August 16. This will bring a handful of new side road closures to the north side of Main St, and several side roads on the south side of Main St. that are currently closed will re-open. The second stage of bridge demolition will also get underway late next week

Concrete pavement, near Rivermoor Road
